

STUDENT ALLERGY PREVENTION AND RESPONSE

The purpose of this policy is to create an organized system for preventing and responding to allergic reactions. This policy is not a guarantee of an allergen-free environment; instead, it is designed to increase awareness, provide education and training, reduce the chance of exposure and outline responses to allergic reactions. The best form of prevention for life-threatening allergies is avoidance of the allergen.

Research shows that allergies can negatively impact student achievement by affecting concentration, auditory processing and attendance. Further, healthy students are better learners. In addition to posing health risks, allergies can be potentially deadly for some individuals.

items that contain added fragrance, but the principal may require staff members to refrain from the use of personal care items with added fragrance under particular circumstances.

Staff members are prohibited from using cleaning materials, disinfectants, pesticides or other chemicals except those provided by the district or pre-approved.

The district will not serve any processed foods, including foods sold in vending machines, that are not labeled with a complete list of ingredients. Vended items must include a list of ingredients on the individual package. The food service director will create an ingredient list for all foods provided by the district as part of the district's nutrition program, including food provided during the school day and in before- and after-school programs. This list will be available upon request.

Prepackaged items used in concessions, fundraisers and classroom activities must include a list of ingredients on the package. If the package does not contain a list of ingredients, the list of ingredients must be available at the location where the package is sold or provided.

Education and Training

All staff members will be regularly trained on the causes and symptoms of and responses to allergic reactions. Training will include instruction on the use of prefilled epinephrine auto syringes. Designated employees will be trained in the administration of asthma-related rescue medications.

In accordance with law, qual6163(a)3.15.39(e3658(n)-0.956417()-0.46417(c)31658(n)-0.956417(i)-20.956417(
